Professional Summary

Software Engineer with hands-on experience in React.js and backend development using Django. Skilled in building RESTful APIs, integrating frontend with backend services, and working with MySQL databases. Strong foundation in HTML, CSS, JavaScript, Git, and full-stack application development.

Technical Skills

Programming: Python, Java, JavaScript

Frontend: React.js, HTML5, CSS3

Backend: Django, Node.js (Basic)

Database: MySQL (Query Optimization, CRUD)

Core Concepts: REST APIs, MVC Architecture, Django ORM, API Security

Tools & Platforms: Git, GitHub, Postman, VS Code, PyCharm, Netlify, Render

Soft Skills: Problem Solving, Team Collaboration, Communication

Education

Bachelor of Technology (Information Technology)	2022 – 2025
Sri Sairam Engineering College, Chennai	7.25 CGPA
Diploma	2019 – 2022
Arasan Ganesan Polytechnic College	8.90 CGPA

Certifications

Cloud Computing (NPTEL): Cloud fundamentals, deployment models, and scalability basics.

Python using AI-ML (IIT Madras): Python programming and machine learning fundamentals.

Internship

Retech Solutions Pvt. Ltd – Full Stack Development Intern

- Handled end-to-end SDLC activities including design, development, integration, and documentation of production-ready applications using Python, Django, MySQL, and JavaScript.
- Developed 8+ RESTful API endpoints with clean separation of frontend and backend; optimized SQL queries and Django ORM, reducing API response time by 35%.
- Documented software functionality and API specifications to support maintainability and knowledge transfer.

Zero Solutions – Web Development Intern

- Built 5+ responsive web pages using HTML, CSS, and JavaScript ensuring cross-browser and cross-device compatibility.
- Integrated frontend with Django backend; resolved 15+ UI issues, improving page load speed by 25%.

Projects

Metal Rate Tracker – Django Web Application

- Designed and developed a data-driven web application to track and visualize historical and date-wise prices of precious metals, applying full SDLC from specification to deployment.
- Built and documented RESTful APIs for fetching and serving large datasets efficiently using Django ORM and MySQL; enforced API security best practices.
- Integrated REST APIs with frontend dashboard and applied efficient data fetching for real-time metal price updates.
- Designed and implemented a calendar-based UI and responsive dashboard, improving user interaction and data accessibility across devices.
- Enhanced database queries and backend logic, reducing query execution time by 40% on datasets of 10,000+ records — demonstrating strong SQL optimization skills.
- Tech Stack:** Python, Django, MySQL, JavaScript | **Tools:** VS Code, PyCharm, Git, Postman
